ABSTRACT	(xiv)
STATEMENT OF AUTHORSHIP	(xv)
 INTRODUCTION	 1
Statement of Purpose	1
Summary of TV Development in Thailand	2
Summary of Conceptual Frameworks of the Study	4
Globalisation, Network Society	4
Digital Television	4
Communication Policy & Thai Policy Development	5
About Research Project	6
Objectives of the Thesis	6
Outline of the Thesis	7
 CHAPTER 1	
GLOBALISATION AND NETWORK SOCIETY	9
An Interdisciplinary Discourse on Globalisation	9
Pro versus Cons: An Internationally Controversial Debate on Globalisation	16
Pro Arguments	17
Con Arguments	19
Network Society and Fast Capitalism	22
Global Communication Industry	29
Summary on Conceptual Framework of Globalisation and Network Society	32

CHAPTER 2	
DIGITAL TELEVISION	35
Global Digital Television in Brief	41
Digitalisation of Communication Technology	49
The Revolution of Communication Technology	49
Contemporary Concepts of Digital Television	57
Basic Principle of Digital Broadcasting Technology	58
The Correlation of Contemporary TV Viewer and Modern DTV	60
Impact of Digital Television on TV Business	66
Challenges of DTV for TV Broadcasting Industry	68
Summary on Conceptual Framework of Digital Television	70
 CHAPTER 3	
COMMUNICATION POLICY AND DEVELOPMENT OF THAI TV	72
Part 1: Communication Policy	72
Defining ‘Policy’	72
‘Vertical’ and ‘Horizontal’ Paradigm of Policy Making	77
Elite Theory: Policy as Elite Preference	79
Conceptual Framework and Development of ‘Communication Policy’	80
Broadcasting Regulation and System	84
Contemporary Concept of Communication Policy (1990s-Present)	86
Trends of Communication Policy in 21 st Century	97
Part 2: Thai Television Development and Policy in Brief (1950-2008)	102
The Establishment of TV in Thailand (1950-1980)	102
Contemporary Thai TV Industry (1981-May 2008)	106
Thai TV Broadcasting Policy and Regulation	112
Impediments To Thailand’s Digital Broadcasting Transition	116
Summary on Conceptual Framework of Communication Policy and Development of Thai TV	120
 CHAPTER 4	
RESEARCH DESIGN	123
Key Research Questions	123
Premises of the Thesis	124

Research Approach and Methodologies Utilised	125
(1) In-depth Interview	126
Characteristics of Thesis Participants	127
Research Instrument	130
Data Presentation	131
(2) Observation	131
Researcher's Preparation Prior to Observation	132
Research Sites	133
Field Studies and Data Collection	134
Data Presentation	135
 CHAPTER 5	
RESULTS – DTV: THAILAND AT THE CROSSROADS	136
Part 1: Major Drives of Transition	136
Part 2: Benefits and Disadvantages of DTV	148
Part 3: DTV and Public Interest	168
 CHAPTER 6	
RESULTS – NATIONAL DTV POLICY AND TRENDS	177
Part 4: National DTV Policy and Regulation	177
Part 5: Trends of DTV in Thailand	204
 CHAPTER 7	
RESULTS – THAI TV STATIONS	
IN TECHNOLOGICAL TRANSITION (PART 1)	219
True Visions	220
Channel 3	234
Channel 7	243
MCOT 9 (Channel 9)	254
 CHAPTER 8

ABSTRACT

The evolution of television and broadcasting technology from analogue to digital brings about changes in the global television industry. This technological transition is related to a political push which is highly concerned with national public interest in relation to socio-economic forces. Thailand's TV industry has also adopted and used digital television (DTV) technologies since the late 1990s in its TV production and broadcasting. The Thai government broadcasting regulators are expected to play a key role in launching and issuing national DTV policy. However, they seem to be involved in a conflict of interest which has negatively impacted Thailand's DTV transition.

This study selects Thailand's TV industry as a case study of a developing country in response to global technological transition. The thesis aims to explore major drives influencing Thai broadcasting in the shift from analogue to digital. It provides recommendations vis-à-vis the establishment of national DTV policy, and the current use of DTV technologies by Thai TV stations. The research project was conducted in Bangkok, Thailand, between October 2006 and October 2007, after the September coup in 2006. Two research methodologies employed in the study are (1) in-depth interviews with 26 experts (TV station administrators and mass communication scholars), and (2) observations of the nine TV stations.

Theoretical concepts in globalisation of communication technologies and communication policy are reviewed. The research reveals two major pushes significantly forcing Thailand's TV industry into a newly administrative sphere. These are: (1) global push, and (2) domestic push; both are extensively addressed in this thesis.

STATEMENT OF AUTHORSHIP

I hereby state that the following thesis is entirely my own original work and has not been submitted for any other degree to any other University or educational institution. All sources of information used in this thesis have been indicated and due acknowledgement has been given to the work of others.
