

**THE ORIGIN AND HISTORY OF SAND**  
**BODIES IN THE PILLIGA STATE**  
**FOREST, NSW.**

**A thesis submitted in partial fulfilment of the requirements for the  
degree of Bachelor of Science (Hons)**

**by**

**Steven Kamper**

**School of Earth Sciences**

**Macquarie University**

**June 1997**

## **ACKNOWLEDGMENTS**

The author would like to thank the following people without whose help the research presented here would not have been possible. Geoff Humphreys supervised the project, providing direction, guidance and assistance in editing of the text. Appreciation is also due to all members of the Macquarie University School of Earth Sciences staff who provided advice, assistance and a sounding-board for discussion. Thanks in particular go to Mr Tom Bradley for prompt processing and production of thin sections, Ms. Carol Lawson for XRD analysis and Dr R.H. Flood for assistance in production of photomicrographs. Finally recognition is made of the contribution of various Macquarie researchers, including successive generations of GEOS 399 students who have added to the body of knowledge pertaining to the Pilliga.

**TABLE OF CONTENTS**

**Abstract** ..... ii

**Acknowledgments** ..... iii

**List of Figures** ..... vii

**List of Tables** ..... ix

  

**Chapter 1: Introduction**

1.1 Background ..... 1

1.2 Aims ..... 4

1.3 Organisation of the Thesis ..... 5

  

**Chapter 2: The Pilliga Area**

2.1 Introduction ..... 7

2.2 Location, Geology and Geomorphology ..... 8

2.3 Soils ..... 12

2.4 Vegetation ..... 16

2.5 Climate and Landuse ..... 16

2.6 Summary ..... 20

  

**Chapter 3: Distribution of Sand Bodies** ..... 21

3.1 Introduction ..... 21

3.2 Strategy ..... 21

    3.2.1 Pre-Field Base Map ..... 23

3.2.2 Ground Truthing .....	25
3.2.3 Road Traverses .....	26
3.2.4 Final Map .....	28
3.3 Distribution of the Sand Bodies .....	30
3.4 Provenance .....	32
3.5 Conclusion .....	

**Chapter 4: Characteristics of the Sand Bodies**

4.1 Introduction .....	34
4.2 Methods .....	37
4.2.1 Overview .....	37
4.2.2 Selection of Sample Sites .....	37
4.2.3 Sample Depths .....	38
4.2.4 Sampling .....	39
4.2.5 Sample Treatment .....	39
4.2.6 Data Analysis .....	40
4.3 Results .....	40
4.3.1 Site Integrity .....	40
4.3.2 Gravel, Sand and Mud percentages .....	41
4.2.3 Analysis of the Sand Fraction .....	48
4.4 Conclusions .....	50

**Chapter 5: Age and Stratigraphic Relationships**

5.1 Introduction .....	52
5.2 Methods .....	52
5.3 Results .....	56
5.3.1 Geometric Shape of the Main Sand Monkey .....	56

5.3.2 Dates ..... 58

5.4 Interpretation ..... 59

5.5 Conclusions ..... 66

**Chapter 6: Post Depositional Modification**

6.1 Introduction ..... 67

6.2 Methods ..... 68

6.3 Mud Percentage ..... 70

6.4 Earthy Fabric ..... 72

6.5 Particle Size Trends with Depth ..... 75

6.6 Bioturbation ..... 78

6.7 Conclusions ..... 82

**Chapter 7: Conclusions**

7.1 Introduction ..... 84

7.2 Distinction between the Sand Bodies ..... 84

7.3 Depositional History ..... 86

7.4 Post Depositional Modification ..... 89

7.5 Comparison with the Riverine Plain ..... 91

7.6 Further Work ..... 92

**Reference List** ..... 94

**Appendices**

Appendix 1: Sample Locations and Codes ..... 102

Appendix 2: Mud / Sand / Gravel Percentages ..... 106

Appendix 3: Mean, Standard Deviation, Skewness and Kurtosis ..... 110

Appendix 4: Bulk Density Measurements ..... 113

Appendix 5: Ant Mound Volumes ..... 114

Appendix 6: Heavy Mineral Analysis ..... 116

Appendix 7: Sample Particle Size Analysis Proforma ..... 119

Appendix 8: Results of T-tests ..... 120

Appendix 9: Particle Size Distributions..... 122
