Part 1 Thesis Introduction	
Chapter 1 Introduction	1
Part 2 Identity Construction	
Overview	17
Chapter 2 Identity construction by leaders	
Section 2.1 Introduction	32
Section 2.2 What and how identities were constructed	32
Section 2.3 The need for the construction of various identities	50
Section 2.4 Conclusion	53
Chapter 3 Identity construction by peers	
Section 3.1 Introduction	54
Section 3.2 What and how identities were constructed	55
Section 3.3 Reasons for the construction of various identities in relation to the wider social and cultural	88

context	
Section 3.4 Some additional evidence to the purposeful construction of identities by civil servant CM	90
Section 3.5 Conclusion	93
Chapter 4 Identity construction by subordinates	
Section 4.1 Introduction	95
Section 4.2 What and how identities were constructed	95
Section 4.3 Conclusion	104
Conclusion to Part 2	105
Part 3 The Generic Structure of the Request E-mail	
Overview	108
Chapter 5 Generic structure of downward request e-mails	
Section 5.1 Introduction	113
Section 5.2 Moves and their lexico-grammar	113
Section 5.3 Participant in the <i>Convincing</i> move and the <i>Requesting</i> move	151
Section 5.4 Rhetorical approaches to topic introduction	154
Section 5.5 Interdiscursivity	160
Section 5.6 Conclusion	162
Chapter 6 Generic structure of lateral request e-mails	
Section 6.1 Introduction	165

Section 6.2 Request e-mails sent from CM to CM	165
Section 6.3 Request e-mails sent from NCM to CM	195
Section 6.4 Conclusion	205
 Chapter 7 Generic structure of upward request e-mails	
Section 7.1 Introduction	208
Section 7.2 Moves and their lexico-grammar	208
Section 7.3 Rhetorical approaches to topic introduction	223
Section 7.4 Conclusion	225
 Conclusion to Part 3	226
 Part 4 Intertextuality and Interdiscursivity	
Overview	228
 Chapter 8 Intertextuality	
Section 8.1 Introduction	230
Section 8.2 Intertextuality across the three directions of communication	231
Section 8.3 Conclusion	243
 Chapter 9 Interdiscursivity	
Section 9.1 Introduction	244
Section 9.2 Discursive blending of institutional, professional and personal discourses	246
Section 9.3 The mixing of formal and informal styles	261

Section 9.4 The use of both deductive and inductive rhetorical approaches	271
Section 9.5 Conclusion	274
Conclusion to Part 4	276
Part 5 Thesis Conclusion	
Chapter 10 Conclusion	277

Abstract

A multi-perspective analysis of the request e-mail discourse of a team of education professionals in Hong Kong.

This thesis analyses the discourse of the request e-mails exchanged among a group of professional teachers of English in a Hong Kong public education institution. As its analytical framework, the study draws on the 'multi-perspectived approach' to analysing professional discourse proposed by Candlin (1997: xiv) and outlined by Bhatia (2004). The request e-mails, categorized basically as downward (from leaders to subordinates), lateral (among subordinates), and upward (from subordinates to leaders), are analysed by treating the discourse as text, genre, professional practice, and social practice. Seeing the discourse as text, the study examines the lexico-grammatical features of the clauses of the e-mails by drawing upon systemic functional grammar (Halliday 1994, Halliday and Matthiessen 2004). It also discusses the use of intertextuality (Fairclough 1992, Candlin and Maley 1997) in the production of the request e-mail discourse. Seeing the discourse as genre and professional practice, the study discusses the rhetorical move structure of the request e-mails in relation to the necessity for the inclusion and exclusion of moves, and the sequence of appearance of these moves in the professional context of the community of practice (Lave and Wenger 1991, Wenger 1998) of which the teachers are members. Another focus in this part of the thesis is interdiscursivity (Candlin and Maley 1997). This discusses how the author's knowledge of genres and discourses contributes to the production of the request e-mail discourse. The use of deductive and inductive rhetorical approaches to topic introduction is also explored in relation to the order of discourse (Fairclough 1992, Foucault 1974) of the community of practice and the institution to which the community of practice belongs as a whole. Seeing the discourse as social practice, the study

discusses the personal identities (Tracy 2002, Simon 2004) constructed by the e-mail authors through their request e-mail discourse by means of analysing lexico-grammatical resources such as process types and modality, influence strategies (Yukl 2006), rapport management (Spencer-Oatey 2000, 2005), relational work (Locher and Watts 2005, Watts 2003), and politeness (Brown and Levinson 1987, Gu 1990, Scollon and Scollon 2001). It is observed that the personal identities constructed through the request e-mail discourse, the lexico-grammatical features of the clauses, the rhetorical move structures of the request e-mails, the rhetorical approaches to topic introduction, and the use of intertextuality and interdiscursivity differ among authors and/or recipients of different status (leader/peer/subordinate) and different cultural background (Chinese members and non-Chinese members). The study offers explanations regarding the effect of status on the request e-mail discourse construction. The cultural background of the authors and/or recipients, however, will be argued to have only affected the authors' choice of Participant terms in the clauses and the construction of identities by the NCM subordinates but not the other aspects of the request e-mail discourse.

Acknowledgements

I would like to thank a number of people who have helped make this thesis a dream come true for me. My PhD Principal Supervisor, Professor Christopher Candlin, has provided me with all the guidance and inspiration that are indispensable for completing this thesis. His timely feedback, which is always critical and valuable, has greatly broadened and enriched my knowledge on linguistics, especially in the field of discourse analysis. Thanks also go to my PhD Associate Supervisor, Dr. Peter Roger. His valuable and practical advice on my PGRF application has made possible my first conference attendance in the UK.

My former teacher and current supervisor at work, Dr. Cynthia Lee of Hong Kong Baptist University, has made my study a lot easier by sharing with me her own experience and giving me all the emotional support that I needed when I was down.

During my on-campus study at Macquarie University, I was lucky enough to have made some very good friends who have made my stay in Sydney a wonderful and unforgettable experience. So, my thanks go to Lanna Leung, Dr. Paul Cheung and his wife Doris Cheung, Dr. Akiko Kato and my very best friend and tennis partner, Dr. Nick Dungey.

Finally, I would like to express a big 'thank you' to my wife, Daisy Chow. She is the one who encouraged me to pursue the degree in the first place. Without her continued support and understanding, I would not have been able to persevere till the end of the study.
