DATING CRITERIA TABLES

The dating criteria are divided into four tables:

Table 1.....Criteria 1 to 30; Table 2.....Criteria 31 to 53b

Table 3.....Criteria 54 to 85; Table 4.....Criteria 86 to 112

On each Table:

- The second column (headed "No") gives the number assigned to the tomb in the Prosopography.
- The third column (headed "DATE") gives the date assigned to the tomb.
- An asterisk (*) marks each recorded occurrence of a criterion, except for Criteria 55 - 63 where the number assigned to each of the priestly gestures is used instead of an asterisk.

- Asterisks accompanied by a question mark indicate some doubt regarding the depiction. Consequently, they are not accepted as first or final occurrences of a criterion.
- Arrows mark the first and last occurrences of each criterion.
- Not every single occurrence of a criterion has been recorded, as this would have made the tables unacceptably long without adding information of value. The aim has been to record sufficient occurrences of criteria to provide an adequate picture of their frequency in each tomb and distribution from tomb to tomb.

Criteria 43a and 43b are so labelled because they were added too late to alter the numbering of the rest of the criteria. This is also the case for 53a and 53b.
